NOTE.—In the above list, Nos. 13035 to 13046 and 13055 to 13068 were marked "*Oryza utlissima*," while Nos. 13047 to 13054 and 13069 to 13076 were labeled "*Oryza glutinosa*."

13077. KUCHIA SCOPARIA.

From Takoma Park, D. C. Grown by Mr. A. J. Pieters during the season of 1904 for stock purposes.

13078. AGARICUS sp.**Mushroom.**

From Tokyo, Japan. Received thru Mr. T. Watase, president of the Tokyo Plant, Seed, and Implement Company, March 7, 1905.

"*Shiitake*." "Spawn of the edible species of Japanese mushroom, which is cultivated on an immense scale in the forests of Japan. It is a tree-inhabiting fungus and the Japanese have developed a special system of culture by means of which they can produce immense quantities at little expense. This spawn was introduced especially for the experiments of Dr. B. M. Duggar, of the Agricultural Experiment Station, Columbia, Mo., and is well worth calling to the attention of the mushroom growers of America, who should be given a chance to test this in comparison with the ordinary *A. campestris*, which is grown almost exclusively on beds of manure. This variety of *Agaricus* is keenly relished, not only by Japanese but by Europeans living in Japan." (Fairchild.)

13079. GOSSYPIMUM sp.**Cotton.**

From Lourenço Marquez, East Africa. Presented by Hon. W. Stanley Hollis, United States consul. Received March 3, 1905.

"From the slopes of the Lebombo Mountains, in the district of Lourenço Marquez." (Hollis.)

13080 to 13083. IPOMOEA HEDERACEA. Japanese morning-glory.
