

104556 to 104604—Continued.

inches high, and the leaves are narrowly cordate. Native to England and northern Europe.

104601. VIOLA MACROCERAS Bunge.

A Siberian violet with cordate crenate-serrate leaves with stems 3 to 4 inches long and fragrant violet flowers.

104602. VIOLA MIRABILIS L.

A hardy violet, native to northern Europe, which becomes about 3 inches high, producing pale-blue flowers in midsummer.

For previous introduction see 72623.

104603. VIOLA PATRINII Ging.

A low stemless perennial, native to northeastern Asia, with a stout root-stalk, ovate-oblong leaves, and lilac flowers about one-half inch in diameter.

For previous introduction see 103898.

104604. VIOLA SYLVESTRIS Lam.

A violet native to France, with stems 3 to 4 inches long, heart-shaped leaves, and ~~and~~ ~~in~~ ~~the~~ ~~axillary~~ violet or nearly white flowers on stalks longer than the leaves.

104605 to 104612. PRUNUS spp. Amygdalaceae.

From Palestine. Trees and scions presented by Asaph Grasovsky, Department of Agriculture and Forests, Jerusalem, through the citrus fruit specialist and chief horticultural officer, Department of Agriculture and Forests, Jaffa. Received March 9, 1934.

A collection of apricot trees and plum scions received under their varietal names, for the use of Department specialists.

104605 to 104608. PRUNUS ARMENIACA L.  
Apricot.

104621. *Teme Cross.*

104622. *Wye Cross.*

104623. PYRUS COMMUNIS L. Malaceae.  
Common pear.

*Bristol Cross.*

104624. RUBUS sp. Rosaceae.

*Ashton Cross*, a blackberry.

104625 to 104661.

From Lithuania. Bulblets and seeds presented by Prof. Dr. C. Regel, Director, Hortus Botanicus Lituaniae, Kaunas. Received March 5, 1934.

104625 to 104635. ALLIUM spp. Liliaceae.  
Onion.

104625. ALLIUM CANADENSE L.  
Meadow garlic.

Bulblets.

104626. ALLIUM CARINATUM L.

Bulblets of a species with narrowly linear leaves and lilac-purple flowers, produced in a comparatively large head. It is found throughout southern Europe, especially in the Alps.

For previous introduction see 91984.

104627. ALLIUM CAMBULEUM Pall.

A blue-flowered onion with slender grassy leaves and 14-inch stalks bearing close heads of small deep-blue flowers.

For previous introduction see 95354.

104628. ALLIUM CYANEUM Regel.

A rather dwarf plant, less than a foot high, with small heads of pendulous pale-blue flowers. Native to northern China.

For previous introduction see 95454.

104629. ALLIUM DARWASICUM Regel.

A rather low allium with flat lanceolate leaves 5 to 6 inches long and white flowers in a roundish head about 1 inch across. Native to Bokhara.

104630. ALLIUM FISTULOSUM L.  
Welsh onion.

A hardy onion, about 2 feet high, with green and yellow flowers.

For previous introduction see 101390.

104631. ALLIUM FISTULOSUM L.

Variety *viviparum*.

A name for which a place of publication and a description have not been found.

104632. ALLIUM FLAVUM L.

A wild onion with an upright or ascending stem up to a foot high, narrowly linear leaves about as long as the stem, and small yellow bell-shaped flowers in a rather dense cluster. Native to dry rocky places, especially in chalky soil, in south-central Europe.

For previous introduction see 91988.
