

**18477. PANICUM MILIACEUM.****Broom-corn millet.**

From New York, N. Y. Received through J. M. Thorburn & Co., May 2, 1906.  
*White French.*

**18478. ASPARAGUS SCABER.**

From Frescati, near Stockholm, Sweden. Presented by Prof. Veit Wittrock.  
Received May 1, 1906.

Seeds obtained for hybridizing work conducted by Mr. G. W. Oliver, of this Department.

**18479. GARCINIA MANGOSTANA.****Mangosteen.**

From Buitenzorg, Java. Presented by Doctor Treub, director of the Botanical Gardens. Received May 5, 1906.

**18480 to 18498.**

From Fürstenalps, near Khur, Switzerland. Presented by Dr. F. G. Stebler, director of the Seed Control Station, Zurich. Received May 4, 1906.

A collection of hardy grass and forage plant seeds raised in Doctor Stebler's alpine garden in the Fürstenalps, near Khur, at an altitude of 5,700 feet. "These are all hardy strains which have been raised for some years in this garden and thoroughly acclimated to a short, cold growing season. That these forms are extremely hardy has been frequently proved by planting commercial seed of the same kind in these gardens, where it is invariably killed out for the most part during the first season." (*Stebler.*)
