

110265 and 110266—Continued.

110265. ENNEAPOGON BRACHYSTACHYUS
(Jaub. and Spach) Stapf. Poaceae.
Grass.

A perennial grass, often caespitose, native to Arabia and northern Africa, with geniculate ascending, slender stems 2 to 6 inches long.

110266. PENNISETUM CILIARE (L.) Link.
Poaceae. Grass.

A perennial grass with ascending stems up to 2 feet long. Native to southern Africa.

For previous introduction see 75345.

110267 to 110269. AMYGDALUS PERSICA
L. Amygdalaceae. Peach.

From Brazil. Seeds presented by C. A. Kurg, Chefe, Departamento Genetica, Instituto Argonomico de São Paulo. Received March 29, 1935. Numbered in April 1935.

Local varieties from Campinas, Minas Gerais, originally selected and propagated from trees naturalized in Brazil. Introduced for Department specialists.

110267. *Abobora*. 110269. *Branca*.

110268. *Amarella*.

110270. LAWSONIA INERMIS L. Lyth-
raceae. Henna.

From Florida. Seeds presented by Hamilton P. Traub, Horticultural Field Laboratory, Bureau of Plant Industry, Orlando. Received March 23, 1935. Numbered in April, 1935.

The henna bush of the Orient; the foliage contains an orange dye. It is a good hedge plant, comparable to *Dodonaea viscosa*.

For previous introduction see 97722.

110271 to 110273.

From Ecuador. Seeds collected by Mrs. Ynes Mexia, Bureau of Plant Industry. Received March 15, 1935. Numbered in April 1935.

110271. BOMAREA sp. Amaryllidaceae.

Collected on the lower slopes of the volcano of Pichincho, Province of Pichincho, December 29, 1934, between 9000 and 12,000 feet altitude. A climbing shrub about 6 feet high; the flowers are crimson without and orange, flecked with black, on the inside. The shrub is quite common in this region and is seen also in the valleys of Quito south of Chillo.

For previous introduction see 108820.

110272. CEDRELA ODORATA L. Meliaceae.
Cigarbox-cedar.

From Quito, January 1934. *West Indian* or *Spanish* cedar. The soft fragrant wood is easily worked and is in great demand for cigar boxes. The tree is also used for shade on coffee plantations.

For previous introduction see 104253.

110273. PASSIFLORA LIGULARIS Juss. Passifloraceae. Sweet granadilla.

From the market in the Valle de Chillo, January 1935.

For previous introduction see 109983.

110274. (Undetermined.)

From Cochinchina. Seeds presented by M. Poillane, Arboretum de Erang Bom, Erang Bom. Received August 21, 1934. Numbered in April 1935.

110275 to 110278. SOLANUM TUBEROSUM
L. Solanaceae. Potato.

From Germany. Tubers presented by Dr. A. Schlumberger, Horticultural Institute, Berlin-Dahlem. Received April 8, 1935.

A collection of scab-resistant potatoes, introduced for Department specialists.

110275. *Aal*. 110277. *Rheingold*.

110276. *Ostragis*. 110278. *Treff As*.

110279 to 110282. FESTUCA RUBRA COM-
MUTATA Gaud. Poaceae.

Chewings fescue.

From New Zealand. Seeds presented by A. S. Paterson & Co., Ltd., Dunedin. Received April 2, 1935.

Introduced for Department specialists.

110279. *Leg*. 110281. *Pol*.

110280. *Cun*. 110282. *M. J*.

110283 and 110284. PRUNUS ARMENIACA
L. Amygdalaceae. Apricot.

From Michigan. Plants presented by Stanley Johnson, Superintendent, Horticultural Experiment Station, South Haven. Received April 8, 1935.

Introduced for Department specialists.

110283. *Isabella*. 110284. *Phillips*.

110285 to 110301.

From China. Seeds collected by Prof. Ira J. Condit, University of California, College of Agriculture, Los Angeles. Received March 28, 1935. Numbered in April 1935.

110285. ACANTHOPANAX TRIFOLIATUM (L.)
C. Schneid. Araliaceae.

From Swatow, Kwangtung. A hardy spiny climbing shrub, native to western China, with slender-stemmed, three-parted, light-green leaves and compound terminal umbels of small greenish flowers followed by small black berries.

For previous introduction see 63330.

110286. ARGYREIA OBTUSIFOLIA Lour. Con-
volvulaceae.

From Canton district, Kwangtung. A woody unarmed climber, native to southern Indo-China, with ovate, obtuse leaves and panicles of showy, white flowers followed by bright-red fruits.

110287. BISCHOFIA TRIFOLIATA (Roxb.)
Hook. Euphorbiaceae.

From Swatow, Kwangtung. A handsome tropical tree, native to southeastern Asia, with bronze-green, trifoliate leaves; suitable for street planting in subtropical regions.

For previous introduction see 67677.

110288. HIBISCUS TILIACEUS L. Malva-
ceae. Linden hibiscus.

From Swatow, Kwangtung. A tall shrub or small tree up to 30 feet high, widely cultivated in the Tropics. The broadly cordate leaves are hoary beneath, and the yellow flowers are 2 to 3 inches long.

For previous introduction see 98781.
