

## 19390 to 19419—Continued.

19391. *PISTACIA CHINENSIS*.

From Wei-tsan Mountains, near Peking. "(No. 63a, Nov., 1905.) A very ornamental tree, growing to quite large dimensions; graceful outlines; large pinnate leaves; small leaflets. The carpellate trees apparently do not grow so large as the staminate trees; fruits very small. May be a good stock for the large-fruited pistaches." (*Meyer.*)

19392. *QUERCUS* sp.

From Chang-li. "(No. 64a, Oct. 13, 1905.) An ornamental oak with broad, glossy leaves; very much used for building purposes. Grows wild in the mountains." (*Meyer.*)

19393. *QUERCUS* sp.

Oak.

From Chang-li. "(No. 65a, Oct. 11, 1905.) A slender growing oak with rather long, serrated leaves looking somewhat like chestnut leaves. Used for poles and building material. Grows wild in the mountains near Chang-li." (*Meyer.*)

19394. *ZIZYPHUS SATIVA*.

Jujube.

From Peking. "(No. 91a, Oct., 1905.) Seeds of a very large variety of 'date' sold in the market. These fruits are well worth growing, tasting very sweet when dried, and are also nice to eat when fresh." (*Meyer.*)

19395. *DIOSPYROS LOTUS*.

Persimmon.

From Wei-tsan Mountains, near Peking. "(No. 94a, Nov., 1905.) A large variety of the wild persimmon; otherwise the same description applies to it as that given for No. 57a, S. P. I. No. 17906." (*Meyer.*)

19396. *LAGENARIA VULGARIS*.

Gourd.

From Hwai jou. "(No. 97a, Nov. 6, 1905.) A pear-shaped gourd used for covering trellises." (*Meyer.*)

19397. *ZIZYPHUS SATIVA*.

Jujube.

From Pee-san. "(No. 98a, Oct. 26, 1905.) Seeds of an elongated fruited variety of the 'date'; very sweet and a heavy bearer." (*Meyer.*)

19398. *LAGERSTROEMIA INDICA*.

Crape myrtle.

From Western Hills. "(No. 102a, Nov., 1905.) Seeds of dark purple crape myrtles growing in old temple gardens." (*Meyer.*)

19399. *KOELREUTERIA PANICULATA*.

Varnish tree.

From Wei-tsan Mountains, near Peking. (No. 103a, Nov., 1905.)

19400. *EUONYMUS* sp.

From Tang-san. "(No. 110a, Oct. 25, 1905.) A very ornamental shrub loaded in the fall with white capsules and scarlet berries." (*Meyer.*)

19401. *AMPELOPSIS TRICUSPIDATA*.

Boston ivy.

From Wei-tsan Mountains, near Peking. "(No. 112a, Nov., 1905.) Should not be planted in a southern exposure unless shaded; where found wild they seem to prefer the northeast and also, although in a less marked degree, the northwest." (*Meyer.*)

19402. *QUERCUS* sp.

Oak.

From Shan-hai-kwan. "(No. 114a, Oct. 17, 1905.) A slender oak with very narrow leaves; produces good poles." (*Meyer.*)

19403. *DIOSPYROS KAKI*.

Persimmon.

From Peking. "(No. 121a, Oct. 2, 1905.) Seeds of a medium-sized persimmon, not much seen for sale here." (*Meyer.*)
