

## 20289 to 20424—Continued.

- 20350.** CRATAEGUS PINNATIFIDA. Hawthorn.  
From near Czernigowka. "(No. 579a, Oct. 23, 1906.) For description see No. 384a (S. P. I. No. 20109)." (*Meyer.*)
- 20351.** ROSA sp. Rose.  
From near Okiansk. "(No. 580a, Oct. 9, 1906.) A wild climbing rose." (*Meyer.*)
- 20352.** ROSA sp. Rose.  
From near Vladivostok. "(No. 581a, Oct. 6, 1906.) A wild rose forming a low, dense bush; of use as a shrub for small gardens." (*Meyer.*)
- 20353.** ROSA RUGOSA. Rose.  
From near Okiansk. "(No. 582a, Oct. 9, 1906.) A very low growing variety of the Japanese rose; of use in small gardens as an ornamental shrub." (*Meyer.*)
- 20354.** ROSA sp. Rose.  
From near Czernigowka. "(No. 583a, Oct. 23, 1906.) A wild rose forming low bushes and covering here and there large areas; of use in parks and gardens as a shrub for the borders." (*Meyer.*)
- 20355.** LILIUM sp. Lily.  
From near Vladivostok. "(No. 584a, Oct. 6, 1906.) Seed of a wild lily found growing between shrubs; not seen in flower, but probably has scarlet blossoms." (*Meyer.*)
- 20356.** LILIUM sp. Lily.  
From the mountains near Czernigowka. "(No. 585a, Oct. 21, 1906.) A lily with very narrow leaves; not seen in flower, but probably has pink blossoms." (*Meyer.*)
- 20357.** ASPARAGUS sp. Asparagus.  
From near Sedansk. "(No. 586a, Oct. 8, 1906.) An ornamental asparagus, seeds of which were collected in northern Korea and sent under No. 433a (S. P. I. No. 20158)." (*Meyer.*)
- 20358.** ACTAEA sp.(?).  
From the forest near Merkoehofka. "(No. 587a, Oct. 24, 1906.) A perennial bearing blue berries and found growing in dense, shady places." (*Meyer.*)
- 20359.** (Undetermined.)  
From Tchien-shan mountains, southern Manchuria. "(No. 588a, June 8, 1906.) A perennial with several short stems, each bearing four dark green, serrated leaves of ovate-lanceolate form. Has long, narrow pods containing many small greenish seeds and is closely related to the Papaveraceæ and Fumariaceæ. It is only to be found in dense, shady places." (*Meyer.*)
- 20360.** ACTINIDIA KOLOMIKTA.  
From the mountains near Merkoehofka. "(No. 589a, Oct. 24, 1906.) These fruits are called *Kishmis* by the Russian settlers here and are collected in the fall and can be kept, when dried, through the whole winter. They are used in bread and confectionery by the country people. See also No. 359a (S. P. I. No. 20197)." (*Meyer.*)
- 20361.** SCHIZANDRA CHINENSIS.  
From near Vladivostok. "(No. 590a, Oct. 8, 1906.) For description see Nos. 360a, 567, and 568. (S. P. I. No. 19602)." (*Meyer.*)
