132244. *Copenhagen market, Oetofte P. 30.*

132245. *Icicle Roskilde P. 30.*

132246. *Oval forcing Toftoe P. 37.*

132247. *Saxa.*

132248 to 132267. CUCUMIS MELO L. Cucurbitaceae. Muskmelon.

From Manchuria. Seeds presented by A. Woeikoff, manager, Garden of Manchurian Flora, Harbin. Received March 28, 1939.

132248. No. 1. Skin white with green stripe, flesh white, sweet, but not very fragrant. The most common form sold in the Harbin market.

132249. No. 2. Fruit oblong; skin white with green stripe; flesh white, sweet, not very fragrant.

132250. No. 3. *Tiger's skin.* Fruit large with vivid black-green stripes on a yellow or yellow-green ground; flesh dark green shading to orange-yellow near the seed cavity; sweet and aromatic.

132251. No. 4. *Ching Pi Gua.* Fruit yellow; flesh white; similar to P.I. 132248.

132252. No. 5. *Tzin Pi.* Fruit yellow with narrow stripes; flesh green and very sweet.

132253. No. 6. Fruit white, very large, egg-shaped; flesh sweet and very aromatic.

132254. No. 7. Fruit white, oblong; flesh not sweet. Possibly a hybrid.

132255. No. 8. Fruit small, skin green, covered with small mesh.

132256. No. 9. *Ya Gua.* Fruit small, round, egg-shaped, white with broken green stripes; flesh white, sweet, crisp, and fairly aromatic. The vine sometimes bears 12 fruits.

132257. No. 10. *Tsin Toutsì.* Fruit muddy green with narrow dark-green stripes; flesh green, aromatic, and, when overripe, sometimes mealy.

132258. No. 11. *Hsiao Shui.* Fruit yellow with broken green stripes; flesh white without liquid in the seed cavity; similar to No. 1 (P.I. 132248).

132259. No. 12. Fruit yellow-white with vivid green stripes; flesh white, aromatic.

132260. No. 14. Fruit long, club-shaped; similar to No. 1 (P.I. 132248).
