**139888 to 139893. BAMBUSA spp. Poaceae. Bamboo.**

**139888. BAMBUSA EUTULDOIDES McClure.**

*No. 10.* A large sympodial bamboo cultivated for its thick-walled upright culms, which are used locally for heavy construction and miscellaneous farm needs.

For previous introduction see 128696.

**139889. BAMBUSA TEXTILIS var. FUSCA McClure.**

*No. 11.* The variety differs from the species in the very much darker, denser, more persistent, appressed pubescence on the culm sheaths. This bamboo is used for the same purpose as the typical form.

For previous introduction see 128746.

**139890. BAMBUSA DISSIMULATOR McClure.**

*No. 12.* A medium-large, somewhat thorny, sympodial species, cultivated for its strong, thick-walled culms, which are used in heavy construction.

For previous introduction see 128750.

**139891. BAMBUSA sp.**

*No. 15.* A large, stiffly upright, much-branched sympodial bamboo, cultivated for its thick-walled straight culms, which are used in heavy construction and for punting poles. The wood is very durable.
