From Peru. Seed donated by F. H. Analt, Bureau of Foreign and Domestic Commerce, United States Department of Commerce. Received May 29, 1941.

Tara. A tall, upright spiny shrub or small tree, often used as a hedge in Peru. The foliage is deep green with the leaflets smooth and polished on the upper surface. The greenish-yellow flowers, in cylindrical open spikes, are not very conspicuous, but the pods are produced in large clusters and the exposed surfaces show bright scarlet for a long time before maturing. The pods contain a high percentage of tannin.
