

337694 to 337704—Continued**337694 to 337703—Continued**

337695. Col. R-37. Gori, Illubabor Province. Elevation 1,974 m. Seed medium; mixed white pearly and light red pearly; excellent quality.

Tessenei, Societe Imprese Africane.

337696. Col. R-116A. Local name Adamayu. Head medium short, very compact, globose to obovate, clustered; glumes short, purple and tan; seed medium, semiglobose. Durra type.

337697. Col. R-141. Head medium, compact to very compact, cylindrical to lanceolate, clustered; glumes short, mahogany; seed medium, reddish yellow, semiglobose. Durra type.

337698. Col. R-142. Head long and large, compact, cylindrical, semi-clustered; glumes medium, mahogany and tan; seed medium large, yellow, semiglobose. Durra type.

337699. Col. R-143. Head medium small, very compact, ovate, clustered; glumes short, purple; seed medium long to medium, awns white, semiglobose. Durra type.

337700. Col. R-144. Head medium, very compact to compact, short-cylindrical, clustered; glumes medium small, sienna and tan; seed medium small, reddish yellow, globose. Durra type.

337701. Col. R-145. Local name Mugud. Head large, very compact to compact, obovate, clustered; glumes short, mahogany; seed large, reddish yellow. Durra type.

337702. Col. R-187. Local name Wad'Akr. Homera Region. Head large, semicompact, cylindrical to lanceolate, clustered; glumes medium short, dark purple; seed medium large, white, turtleback.

337703. Col. R-440. Head ovate, seed clustered, semicompact, 18 cm. long; glumes $\frac{1}{2}$ of seed, brown, short awns; seed medium small, broadly ovate, reddish light brown.

337704. TRITICUM AESTIVUM L. Gramineae. Common wheat.

Col. R-67. Market, Debre Berhain, Shoa Province. Purple pigmented seed with slight mixture of normal red.

✱ **337705 to 337713.** TRITICUM AESTIVUM L. Gramineae. Common wheat.

From Colombia. Seed presented by Mario Zapata B. Instituto Colombiano Agropecuario, Bogota. Numbered Oct. 15, 1968.

337705. 'Bonza 63'. **337710.** 'Miramar 63'.

337706. 'Crespo 63'. **337711.** 'Napo 63'.

337707. 'ICA-Samaca 68'. **337712.** 'Tiba 63'.

337708. 'ICA-Sugamuxi 68'. **337713.** 'Tota 63'.

337709. 'ICA-Zipa 68'.

✱ **337714.** IPOMOEA BATATAS (L.) Lam. Convolvulaceae. Sweetpotato.

From the United States. Plants propagated by R. P. Kahn, Plant Quarantine Division, United States Plant Introduction Station, Glenn Dale, Md. Numbered Oct. 18, 1968.

Virus free normal size plants produced from P.I. 308200 by heat therapy and tip propagation.

337715 to 337717.

From the Netherlands. Seed presented by A. C. Zeven, Institute of Plant Breeding, Wageningen. Received Oct. 21, 1968.
