

380603 to 381079—Continued

380909 to 380913—Continued

380911. 96. Twenty-six km. south of Chalus. Seed on ground. Elevation 550 m. Wild.

380912. 217. Sanandaj. Annual prostrate with 3 to 4 spirals. On abandoned irrigated land. Elevation 1,650 m. Wild.

380913. 253. Gazvin. Winter annual with long burs. Abundant in formerly cropped wheat land. Seed shattered. Wild.

380914 to 380918. *MEDICAGO SATIVA* L.

Alfalfa.

380914. 252. Twenty km. south of Gazvin. Semi-erect, heavy early seeder. Purple blooms. Old field left for seed in salty area. Cultivated.

380915. 268. Zanjan. Commercial. Seed grown at Tabriz. Cultivated.

380916. 329. Talu. Low crown type. Spiral pods, purple flowers. Clay loam in protected area. Wild.

380917. 332. Ghochak. Low crown type. Purple blossoms. Probably escaped from cultivation.

380918. 429. Ghazvin. Seed imported originally from Afghanistan. Sold and used locally near Ghazvin. Cultivated.

380919. *MEDICAGO TRUNCATULA* Gaertn.

254. Five km. northeast of Gazvin. Winter annual, spiny bur. In winter wheatfield. Elevation 1,500 m. Wild.

380920. *MEDICAGO* sp.

98. Ten km. west of Marzinabad. Annual with large spiny burs to 2 cm., 3 spirals. Seed on ground, grazed closely. Elevation 850 m. Wild.

380921 to 380923. *MELICA CUPANI* Guss. Gramineae.

380921. 219. Eighteen km. north of Sanandaj. Perennial to 30 cm. tall. Protected area on dry basalt hill. Few plants. Elevation 1,460 m. Wild.

380922. 348. Nujian, Dez Watershed Camp, 50 km. north of Khorramabad, Loristan Province. Perennial plant to 30 cm. tall. Abundant. Old plants to 15 cm. in diameter. Dry, rocky east slope in oak forest. Elevation 1,900 m. Wild.

380923. 454. Above ski slope, Gajere. Large plants. In dry, stony soil among large basalt boulders. Wild.

380924 to 380927. *MELICA INAEQUIGLUMIS* Boiss.

380924. 100. Ten km. west of Marzinbad. Vigorous, good seeder. Abundant. Growing in pine tree planting with *Dactylis*. Wild.

380925. 180. Verusk. Large plants, scarce. Growing in association with crested wheatgrass and *Artemisia monogyne*. Wild.

380926. 183. Twenty-five km. east of Tehran. Mature. Invading abandoned crop land. Wild.

380927. 290. Seritchal. Plant to 20 cm. tall and 30 cm. in diameter. Abundant seeder. Dry, rocky slopes. Wild.

380928. *MORUS ALBA* L. Moraceae.

310. Atangeh, north of Karadj. Trees over 100 years old. Ten percent of fruit all white. Wild.
