

32777 to 32783—Continued.**32780.** BRADBURYA PUBESCENS (Benth.) Kuntze.

“A leguminous vine being experimented with at Buitenzorg, Java, as a green-manure crop. It has much the habit of *Bradburya plumieri*.”

32781. APOCOPIS sp.

“An unknown grass growing in the garden at Buitenzorg, Java, from seed collected in New Guinea. It apparently has considerable promise as a pasture grass for the extreme southern States.”

32782. INDIGOFERA LINIFOLIA (L. f.) Retz.

From Pusa, India.

“An annual legume abundant throughout the upper Ganges Valley, and also in the Bombay Presidency, India. In some sections it is considered one of the best native legume varieties. It should succeed well under southern California conditions.”

32783. ZORNIA DIPHYLLO (L.) Pers.

From Bangalore, India.

“An annual legume found throughout the upper Ganges Valley and in the Bombay Presidency, and of similar value to the preceding number.”

32784 to 32826.

From Seharunpur, India. Presented by Mr. A. C. Hartless, Superintendent, Government Botanic Gardens, at the request of Mr. C. V. Piper of the Bureau of Plant Industry. Received February 8, 1912.

Seeds of the following; quoted notes by Mr. Piper:

32784. ANDROPOGON HALEPENSIS (L.) Brot.

“This is the variety of *Andropogon halepensis* common throughout the Ganges Valley. It is quite different from the ordinary variety of Johnson grass introduced into this country, having a much larger, looser, drooping panicle, but also having the same development of rootstocks and being equally weedy. It should be tested with care.”

32785. ARTEMISIA sp.

This was received under the name *Artemisia jacobumviridis*, but as yet the place of publication of this name has not been found.

32786. BAUHINIA PURPUREA L.

“Very similar to *Bauhinia variegata* (S. P. I. No. 32787), but the flowers are red.”

Distribution.—A medium-sized tree found in India from the foot of the western Himalayas to Ceylon, and eastward to China.

32787. BAUHINIA VARIEGATA L.

“A small tree, with butterfly-shaped leaves, and showy white flowers.”

Distribution.—A tree found throughout India from the western Himalayas to Burma, and eastward to China.

32788. BELOU MARMELOS (L.) Lyons.

Bael.

32789. BERBERIS ARISTATA DC.

Barberry.

32790. BISCHOFIA JAVANICA Blume.

“What has been identified as this same species seems to have been introduced into Florida some time ago, and at Oneco there is a beautiful specimen which, although injured during the great freezes, has recovered and is now a very beautiful shade tree.” (*David Fairchild.*)
