| 33536. <i>Albillo.</i> | |

33541 and 33542.

From Basse Terre, Guadeloupe, French West Indies. Presented by Mrs. Frederick F. DuMont, American consulate. Received May 6, 1912.

Seeds of the following; quoted notes by Mrs. DuMont:

33541. CUCURBITA PEPO L. Pumpkin.

"Seed from a very large fruit over which all the natives were greatly excited, eagerly taking the seeds. It was 27 inches in diameter and tasted very well when cooked."

33542. CUCUMIS MELO L. Muskmelon.

"Seed from an especially good fruit eaten in February, 1912. Large, oblong, 9½ inches long, 6½ inches broad. Not very deeply grooved. Yellowish green outside with a deep-yellow flesh. Pulp extends well toward the center of the melon, is sweet with a special flavor."

33543 to 33550.

From India. Presented by A. C. Hartless, Superintendent of the Botanical Gardens, Seharunpur, India, at the request of Mr. C. V. Piper, Bureau of Plant Industry. Received April 26, 1912.

A collection of seeds of trees and shrubs, mostly ornamental. They are likely to succeed in this country only in southern Florida and southern California.

Quoted notes by Mr. Piper:

33543. AMERIMNON LANCEOLARIUM (L. f.) Kuntze.

(*Dalbergia lanceolaria* L. f.)

"A tall, graceful tree, fairly satisfactory for shade. It is not as good as the sissou."

Distribution.—On the plains of India from the western Himalayas to Ceylon.

33544. BEAUMONTIA GRANDIFLORA (Roth) Wall. Nepal trumpet flower.

"An evergreen climber with broad leaves and bearing throughout the summer large, pure white, odorous, trumpet-shaped flowers. A very handsome vine for porches and trellises."

Distribution.—The slopes of the Himalayas up to an elevation of 4,000 feet from Nepal to Sikkim in northeastern India.

33545. BERBERIS ARISTATA DC. Barberry.

See No. 27116 for previous introduction.

33546. DEGUELIA TIMORIENSIS (DC.) Taubert.

(*Derris scandens* Benth.)

"A climbing legume used for trellises and arbors."

Distribution.—Throughout India and eastward to China, and through the Malay Archipelago to Australia.

33547. HETEROPHRAGMA ADENOPHYLLUM (DC.) Seem.

"A large tree with handsome leaves and large yellow flowers. Used as an avenue tree."
