

33595 to 33623—Continued.**33599.** *ALYSICARPUS BUPLEURIFOLIUS* (L.) DC.

“(No. 117, September 26, 1911.) From Dehra Dun. A similar but apparently distinct species from the preceding (S. P. I. No. 33598).”

Distribution.—Throughout India and eastward to China and in the Malay Archipelago and the Polynesian Islands.

33600. *ALYSICARPUS VAGINALIS* (L.) DC.

“(No. 116, September 25, 1911.) From Dehra Dun. Very similar to the preceding (S. P. I. No. 33599), and perhaps the same.”

33601. *CENCHRUS BIFLORUS* Roxb.

“(No. 106, September 20, 1911.) Collected at Lucknow.”

See No. 33602 for description.

Distribution.—The plains of India and westward to Baluchistan, Arabia, and northern Africa.

33602. *CENCHRUS BIFLORUS* Roxb.

“(October 7, 1911.) Collected at Agra. This grass is very similar to No. 105 (S. P. I. No. 33611) in all respects, but is regarded as inferior for feed.”

33603. *CENCHRUS BIFLORUS* Roxb.

“(No. 138, September 29, 1911.) From Lahore.”

See No. 33602 for description.

33604. *CROTALARIA MEDICAGINEA* Lamarck.

“(No. 123, September 13, 1911.) From Samaria Ghat. An annual erect legume growing 18 to 30 inches high, very closely resembling alfalfa in appearance. Flowers pale yellow. The leaves have a good flavor, and it looks as if it might be a good fodder plant.”

33605. *CROTALARIA MEDICAGINEA* Lamarck.

“(No. 124, September 15, 1911.) From Waini. The same as the above (S. P. I. No. 33604).”

Distribution.—From Afghanistan eastward through India and China, and through the Malay Archipelago to Australia.

33606. *CAPRIOLA DACTYLON* (L.) Kuntze.

(*Cynodon dactylon* Pers.)

“This is the common form as it appears in the Ganges Valley and should be tested in comparison with the form in this country. This seed was presented by Mr. A. C. Hartless, Superintendent of the Botanic Gardens, Seharunpur, India.”

33607. *FESTUCA GIGANTEA* (L.) Vill.

“(No. 127, September 23, 1911.) From Mussoorie. A shade grass growing to a height of 2½ to 3 feet.”

Distribution.—Throughout Europe and northern Asia, extending southward to the Himalayas, and in tropical Africa.

33608. *INDIGOFERA LINIFOLIA* (L. f.) Retz.

“(No. 120, September 22, 1911.) From Dehra Dun. A legume with fine stems and numerous small leaves, growing to a height of 6 or 8 inches. Considered one of the best pasture plants of the Ganges Valley.”

33609. *PANICUM ANTIDOTALE* Retz.

“(No. 108, September 20, 1911.) From Lucknow. A coarse species having much the same habit as guinea grass, growing abundantly at Lucknow.”
