

33913 to 34038—Continued.

(Enumeratio Plantarum Caribæum, p. 19, 1760), quite disregarding the fact that Loeffling had previously published the name *Gaura fruticosa* for this species. In accordance with nomenclatorial usage it is necessary to adopt the earliest specific name, *fruticosa*.

Distribution.—An ornamental climbing shrub with orange and green flowers; found in Brazil.

33947. CONYZA AGERATOIDES DC.

Distribution.—A composite herb found in meadows and cultivated fields in the island of Madagascar.

33948. CONYZA CHILENSIS Spreng.

Distribution.—A biennial yellow-flowered herb belonging to the aster family; found in Chile.

33949. CORDIA CORYMBOSA (L.) G. Don.

(*Cordia monosperma* R. and S.)

Distribution.—A shrub found in the West Indies and in tropical South America.

33950. CRINODENDRON PATAGUA Molina.**Chequehue.**

(*Tricuspidaria dependens* R. and P.)

See No. 25489 for description.

33951. CUPANIA VERNALIS St. Hil.

Distribution.—A large timber tree found in the province of Rio Grande do Sul in southern Brazil.

33952. DIOSCOREA BONARIENSIS Tenore.

Distribution.—A climbing vine found in the vicinity of Buenos Aires in Argentina.

33953. DOLICHANDRA CYNANCHOIDES Cham.

(*Macfaydenia dolichandra* Benth.)

Distribution.—A shrubby vine with trumpet-shaped, reddish purple flowers found in the extratropical forests of Brazil.

33954. ECHINODORUS GRANDIFLORUS (C. and S.) Micheli.

(*Echinodorus floribundus* Seub.)

Distribution.—An herbaceous perennial found in stagnant and slow-moving waters along the coast of South America from Rio de Janeiro to Uruguay.

33955. ENTEROLOBIUM CONTORTISILIQUM (Vell.) Morong.

(*Enterolobium timbouva* Mart.)

Distribution.—A large leguminous timber tree found in Paraguay. It is often planted as a street tree, the wood is much used in carpentry, and the fruits, called "orejás de negro," are used to remove spots from linen.

33956. ERYTHRINA CRISTA-GALLI L.

See No. 32051 for previous introduction.

33957. ERYTHRINA sp.**33958. EUGENIA MATO Grisebach.**

Distribution.—A tree with edible fruits, forming the principal part of the forests in the vicinity of Tucuman in Argentina.

33959. EUGENIA PUNGENS Berg.

Distribution.—An edible-fruited tree with hard wood found in the province of Sao Paulo in Brazil.
