

**38209. ANACARDIUM EXCELSUM (Bert. and Bal.) Skeels. Anacardiaceae.**  
(*Anacardium rhinocarpus* DC.)

From Santiago de las Vegas, Cuba. Presented by Mr. J. T. Crawley, director, Agricultural Experiment Station. Received May 18, 1914.)

"Fruits of a rare tree. This fruit was collected at Casilda, Trinidad, Santa Clara Province, and is commonly known as *nariz* on account of its similarity to the fruit of the *Marañon* (*Anacardium occidentale*) in appearance, foliage, and inflorescence. It is a very tall tree; the leaves are very large and the peduncle not so succulent as in the *Marañon*. The botanist thinks that it could perhaps be *Anacardium rhinocarpus*, and says that it is found only in the district of Trinidad, and no use is made of the tree or its fruits." (Crawley.)

**38210 to 38212.**

From Asmara, Eritrea, Africa. Presented by the Direzione di Colonizzazione Service. Received May 18, 1914.

**38210. COLUTEA ISTRIA Miller. Fabaceae.**  
(*Colutea halepica* Lam.)

See S. P. I. No. 33029 for previous introduction.

"A shrub 1 to 4 meters high with the appearance of *C. arborescens*, from which it differs in its smaller, oblong, slightly silky leaves, in its raceme of 2 to 4 flowers, and in its legumes, which are more acute at the two extremities. Rocky places of the Altipiano and its slopes, at 1,600 to 2,600 meters." (Adriano Fiori, *Boschi e Piante legnose dell'Eritrea*, p. 184.)

**38211. SESBAN sp. Fabaceae. 38212. (Undetermined.)**

**38213 to 38228.**

From Tokyo, Japan. Presented by the director, Japanese Imperial Department of Agriculture. Received May 15, 1914.

**38213 to 38220. SOJA MAX (L.) Piper. Fabaceae. Soy bean.**  
(*Glycine hispida* Maxim.)
