

coast of Hondo, where it is associated with camellia, *Diospyros kaki*, and other garden favorites, it is somewhat different from the inland trees; the head is more dense and with a rounded top not unlike that of some of the older yews in this country; the leaves too are shorter, narrower, and more pointed. The wood is strong and straight grained; it is much valued for building and cabinetmaking." (*Veitch, Manual of Coniferae, 2d ed., p. 119.*)

43076 to 43112. PRUNUS NIGRA Ait. Amygdalaceæ.

Canada plum.

From Canada. Scions secured by Mr. M. J. Dorsey, University of Minnesota, St. Paul. Received August 7, 1916.

43076 to 43088.

"Scions from the most promising of the W. D. Buchanen seedlings, growing in the orchard at the Manitoba Agricultural College. These were selected for their promise from the larger collection of Mr. Buchanen and represent the best wild types found in the range of the species in Canada. No records are available as to their exact place of origin. The numbers refer to the row and tree locations in the above orchard." (*Dorsey.*)

43082. Row 2, tree 1.	

43089 to 43112.

"Scions taken from the best trees now remaining in the Buchanen nursery, near Winnipeg. These were selected with the assistance of Mr. Buchanen and are numbered as they were cut. All records of their origin are lost and no labels are legible. The types represent the best of the species in Canada and should be of interest both for their fruit and also taxonomically. None of the seedlings show any evidence of winter-killing, and for this reason they are no doubt of value as breeding stock for the northern United States." (*Dorsey.*)
