

**44713 to 44720. MALUS SYLVESTRIS Miller. Malaceæ. Apple.**  
(*Pyrus malus* L.)

From Ottawa, Ontario, Canada. Cuttings presented by Mr. W. T. Macoun, Dominion horticulturist. Received May 4, 1917. Quoted notes from the Reports of the Horticulturist, Experimental Farms, Ottawa, Canada, 1906 to 1915, which should be referred to for a full account of the development of the remarkable collection of seedlings at the Experimental Farms, Ottawa.

**44713.** "*Anson* (*Winter St. Lawrence* seedling). Fruit of medium size, roundish, slightly ribbed; cavity of medium depth and width; stem short, stout; basin deep, narrow, wrinkled; calyx closed; skin moderately thick, tough, pale yellow to almost white, thinly splashed and streaked with carmine; the dots obscure; flesh white, fine grained, tender, juicy; core and seeds of medium size; flavor subacid, pleasant, Fameuselike; quality good to very good; season October, probably through November.

"Resembles *Winter St. Lawrence* a little in flavor. Distinctly of the *Fameuse* group. Quite promising, season coming just before *McIntosh* and *Fameuse*."

**44714.** "*Battle* (*Wealthy* seedling). Fruit above medium to large in size, roundish conic; cavity deep, of medium width; stem short to medium, stout; basin of medium width and depth, almost smooth; calyx closed or partly open; skin moderately thick, tough, pale greenish yellow, well splashed and washed with bright purplish red; the dots few, yellow, distinct; flesh white, tinged with red, firm, crisp, breaking, tender, rather coarse, juicy; flavor briskly subacid, aromatic, raspberrylike; core medium; quality good; season late August to early September; ripens before *Duchess*.

"Handsome in appearance. Resembles *Wealthy* somewhat in outward appearance and flavor. Should make an excellent cooking apple, and is good for dessert."

**44715.** "*Drumbo* (*Winter St. Lawrence* seedling). Fruit above medium to large in size, conical; cavity deep, of medium width, russeted; stem short, stout; basin deep, medium width, slightly wrinkled; calyx open or partly open; skin thick, moderately tender, pale yellow, well washed and splashed with dark crimson; the dots few, gray, conspicuous; seeds medium size, acute; flesh white, rather coarse, tender, juicy; core medium; flavor subacid, pleasant; quality good; season, late November to February or later. Resembles *Winter St. Lawrence* very much in outward appearance, flesh, and flavor. Evidently a better keeper than *Winter St. Lawrence*."

**44716.** "*Galetta* (*Wealthy* seedling). Fruit above medium in size, roundish, flattened at both ends; cavity deep, open, slightly russeted; stem short, stout; basin deep, open, wrinkled; calyx closed or partly open; skin thick, moderately tough, pale yellow, washed and splashed with red, with a suggestion of pink, mostly on the sunny side, the dots obscure; flesh white, crisp, tender, juicy; core medium; flavor subacid, pleasant; quality good; season late August to early September. Promising. Of good quality. A good eating apple. Resembles *Wealthy* somewhat in outward appearance."
