

## 49051 to 49123—Continued.

- 49118 and 49119. *ROSA RUBIGINOSA* L. Rosaceæ. Sweetbrier.  
 49118. "(No. 3. November 14, 1919.)" An erect, compact shrub, 3 to 5 feet high, with stout, scattered, hooked prickles and 5 to 7 small, ovate, acute, dull-green leaflets that are nearly or quite glabrous above and densely glandular (scented) and slightly hairy beneath. It bears one to four bright-pink, corymbose flowers; the fruit is dark red and does not ripen until October. The sweetbrier is wild throughout Europe; it extends to Teneriffe and Persia, and is naturalized in the eastern United States. (Adapted from Willmott, *The Genus Rosa*, pt. 23, p. 449.)
49119. "(No. 11. November 14, 1919.)"
49120. *ROSA SATURATA* Baker. Rosaceæ. Rose.  
 "(No. 13. November 14, 1919.)"  
 A shrub, up to 8 feet in height, native to central China. The deep-red flowers are about 2 inches in diameter and are borne singly or in twos or threes. The obovoid fruits are coral red. (Adapted from Willmott, *The Genus Rosa*, pt. 25, p. 503.)  
 For previous introduction, see S. P. I. No. 43911.
49121. *ROSA SETIGERA* Michx. Rosaceæ. Prairie rose.  
 "(No. 27. November 14, 1919.)"  
 A very tall rose with arching stems, small scattered prickles, and large single pink or white flowers borne in few-flowered lax corymbs. The fruits are red. The prairie rose, as this is called, is found from Florida and Texas northward to the Great Lakes. (Adapted from Willmott, *The Genus Rosa*, pt. 4, pl. 23.)
49122. *ROSA TURKESTANICA* Regel. Rosaceæ. Rose.  
 "(No. 2. November 14, 1919.) Erect, tall, not many thorns. Fairly good grower; scant seeder. Oblong bright-red hips three-fourths of an inch long and three-eighths of an inch in diameter."
49123. *ROSA* sp. Rosaceæ. Rose.  
 "(No. 4. November 14, 1919.)"  
 Received as *Rosa obtusiloba*, for which a place of publication has not been found.
