55166 to 55211. *HIBISCUS* spp. Malvaceæ.**Hibiscus.**

From Honolulu, Hawaii. Cuttings secured by Mrs. J. Rappe Myers, in Honolulu, and sent in by J. M. Westgate, agronomist in charge, Agricultural Experiment Station. Received March 27 and 30, 1922. Quoted notes by Mrs. Myers, unless otherwise stated.

The Chinese hibiscus is one of the most popular and useful decorative plants of tropical gardens and is cosmopolitan in its distribution. Probably in no other region, however, has so extensive a series of choice horticultural forms been brought together as in Hawaii. In most parts of the Tropics only two or three varieties are seen, usually the single scarlet and the double scarlet. In recent years some excellent sorts have been distributed by Florida nurserymen, yet it is felt that much more can and should be done to popularize the newer delicately colored varieties, and toward this end the following collection has been secured in Honolulu by Mrs. J. Rappe Myers. They should prove of real value in southern Florida and in Porto Rico, the Canal Zone, and the American Tropics generally.

"Most of these varieties are the productions of Gerrit P. Wilder."

55166 to 55192. "Collected March 11, 1922."

55166 to 55170. "Collected in Mrs. George Sherman's garden."

55166. *HIBISCUS SYRIACUS* L.

"(No. 1.) A lavender variety; originally from Japan."

55167. *HIBISCUS* sp.

"(No. 2.) Single pink, shading white to the center."

55168. *HIBISCUS* sp.

"(No. 3.) Single orange."

55169. *HIBISCUS* sp.

"(No. 4.) Single, light pink."

55170. *HIBISCUS* sp.

"(No. 5.) 'Laurita Sherman.'"
