

61634 to 61695—Continued.

61668. No. 420. Mochudi, Bechuanaland. June 15, 1924. Similar to 421 [S. P. I. No. 61669], but known as *Sefoke*.
61669. No. 421. Known as *Noanya-anthana*, a good late variety.
61670. No. 422. Typical Mabele, known as *Sekamfokane*.
61671. No. 423. One of the best types, known as *Segaolane*.
61672. No. 424.
61673. No. 460. June, 1924. A sample of the Kafir corn.
61674. *HOLCUS SORGHUM VERTICILLIFLORUS* (Steud.) Hitchc. Poaceae.
Tabucki grass.
No. 306. May 8, 1924. Wild sorghum variety, very abundant on lowlands above southern end of Nyasaland, Domira Bay.
61675. *HYPERICOPHYLLUM* sp. Asteraceae.
No. 262. Livingstonia. April 23, 1924. A beautiful composite with deep, rich-red flowers.
61676. *MANISURIS* sp. Poaceae. Grass.
No. 307. Domira Bay, May 8, 1924. A very tall rank grass abundant on the lowlands about Lake Nyasa, especially on the black cotton soils, where it grows from 6 to 8 feet high and produces a heavy crop of seed.
61677. *ORYZA SATIVA* L. Poaceae. Rice.
No. 201. Beira, Portuguese East Africa. April 20, 1924. A very low-growing, small-seeded variety. Grown at Beira on drier land. It has a peculiar odor and may be valuable.
61678. *PANICUM MADAGASCARIENSE* Spreng. Poaceae. Grass.
No. 202. Beira, Portuguese East Africa. April 20, 1924. A small grass, very attractive and valuable as an ornamental.
61679. *PANICUM* sp. Poaceae. Grass.
No. 388. Tjolotjo, June 11, 1924. One of the grasses which is most successful in the semiarid agriculture of the eastern Kalahari.
61680. *POGONAETHRIA* sp. Poaceae. Grass.
No. 418. Tjolotjo, Southern Rhodesia. June 11, 1924. Mixed grass seed of the type which forms the grass cover on the eastern edge of the Kalahari Desert.
61681. *SESAMUM ANGOLENSE* Welw. Pedaliaceae.
No. 386. Tjolotjo, Southern Rhodesia. June 11, 1924. This appears to be a smaller flowered type of wild sesame than is found in Central Africa.
61682. *SOLANUM TUBEROSUM* L. Solanaceae. Potato.
No. 293. Livingstonia. April 30, 1924. Brought from Scotland some years ago and grown on the highlands above Nyasaland.
- 61683 and 61684. *SORGHUM VERSICOLOR* Anderss. Poaceae. Black Sudan grass.
61683. No. 239. April 23, 1924. A rather small plant about 3 to 6 feet high, abundant along the road south of Fort Johnston, Nyasaland.

61634 to 61695—Continued.

61684. No. 340. May 13, 1924. A dark-seeded plant resembling Sudan grass, abundant along roadways at the southern end of Lake Nyasa. The heads are dark, drooping gracefully, and the seeds shatter easily.
61685. *SPOROBOLUS* sp. Poaceae. Grass.
No. 208. Beira, April 22, 1924. The golf course at Beira is made up of this grass. When closely clipped it makes a good turf. Most of the golf course is near tidewater level.
61686. *STERCULIA* sp. Sterculiaceae.
No. 240. Fort Johnston. April 22, 1924. A large white-barked tree with very soft wood. The leaves are somewhat like those of the cotton plant. The pods are large, resembling those of *Asclepias*, but with stinging hairs around the aril, which is bright red. It is sometimes called the "fever" tree and is locally known as N'goza. The seeds are said to be picked to form a powder used as snuff.
61687. *TERMINALIA SERICEA* Burchell. Combretaceae.
No. 407. Tjolotjo, Southern Rhodesia. June 11, 1924. A well-shaped ornamental tree, suitable for a semiarid country; the yellow wood is of excellent quality and the most valued of any in the region. Bark cloth of poor quality is made from the bark. The tree is known under the native names of *Umangwe*, *M'Susu*, *M'Tarataka*, etc.
61688. *THEMEDA* sp. Poaceae. Grass.
No. 443. Ramanthlava, Bechuanaland. June 16, 1924. Mixed grass seed from the acacia-tall-grass belt, which is probably the most successful grazing region of Africa.
61689. *TRADESCANTIA* sp. Commelinaceae.
No. 263. Livingstonia. April 27, 1924. A very delicate variety with showy flowers; it should be of value as an ornamental.
- 61690 to 61692. *TRICHOLAENA ROSEA* Nees. Poaceae. Natal grass.
61690. No. 295. April 30, 1924. Mixed grass seed from the hills above Livingstonia.
61691. No. 305. Koto Koto, Nyasaland. May 7, 1924. A rather large type, abundant west of Lake Nyasa on the lowlands.
61692. No. 319. M'Khoma, Nyasaland. May 12, 1924. A grass grown in native sod.
61693. *TRITICUM AESTIVUM* L. (*T. vulgare* Vill.). Poaceae. Common wheat.
No. 294. Livingstonia. April 30, 1924. Wheat grown on the highlands above Nyasaland. It yields fairly well here. Much of the flour used here is produced on the highlands.
- 61694 and 61695. *VIGNA SINENSIS* (Torner) Savi. Fabaceae. Cowpea.
Nos. 389 and 419-b. Tjolotjo, Southern Rhodesia. June 12, 1924. An important crop at the edge of the desert. There are many types grown in the same field. An effort was made to include all types in the sample.
61694. No. 389. 61695. No. 419-b.
